

CSA65 – UNIT I ASSESSMENT, TOOL 1

Concept Map / Mind Map — AI, ML, DL, Generative AI & LLMs

Assignment Overview

Create a concept map (mind map) that shows how Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, and Large Language Models relate to one another — plus one real-world example connected to each concept.

Assigned	Monday, 20-Jul-2026
Due	Friday/Saturday, 21-Jul-2026
Marks	5 marks (Internal / CA)
Submission	Upload a photo/scan or exported file to the class portal before class starts on Day 4

What Your Map Must Include

- All 5 concepts: Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, Large Language Models.
- Clear connections showing HOW they relate — which is a subset of which, and where Generative AI/LLMs fit inside the hierarchy.
- One real-world example linked to each concept (e.g. a specific app, tool, or use-case you've seen or used).
- Labels or short notes on your connecting lines explaining the relationship, not just an arrow.

Format — Your Choice

- Hand-drawn on paper, then photographed clearly (good lighting, no glare, all text readable).
- Digital: PowerPoint/Google Slides with SmartArt, or a free tool like draw.io, Miro, or Canva.
- Any format is fine — the rubric rewards clarity and organization, not which tool you used.

How You'll Be Graded

Criteria	Weight	What Gets Full Marks
Technical / Concept	30%	All 5 concepts correctly placed with clear hierarchical relationships
Application	25%	Real-world examples linked accurately to each concept
Quality	20%	Logical, well-organized structure with clear connectors
Presentation	15%	Visually clear, creative, easy to interpret
Documentation	10%	Concise labels/notes that add clarity

Academic Integrity

You may discuss ideas with classmates, but your map must be your own individual work — identical or near-identical maps between two students will both be flagged for review.

Need Help?

Office hours are available between Day 2 and Day 4 if you're stuck on how the hierarchy fits together — this is exactly what Day 2's class covered, so review those notes first.
